

## Upright Irish Yew

*Taxus baccata 'Fastigiata Robusta'*

Height: 40 feet

Spread: 15 feet

Sunlight: ○ ● ●

Hardiness Zone: 6

Other Names: Common Yew

### Description:

A narrowly upright and very tall evergreen tree with almost vertical branching, deep green needles and interesting red berries; ideal for articulation, makes a great tall hedge or screen, takes pruning exceptionally well

### Ornamental Features

Upright Irish Yew has dark green foliage which emerges light green in spring. The ferny leaves remain dark green throughout the winter. The flowers are not ornamentally significant. The fruits are showy red drupes displayed from early to late fall.

### Landscape Attributes

Upright Irish Yew is a dense evergreen tree with a narrowly upright and columnar growth habit. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance tree, and can be pruned at anytime. It has no significant negative characteristics.

Upright Irish Yew is recommended for the following landscape applications;

- Accent
- Vertical Accent
- Hedges/Screening
- Topiary

### **Planting & Growing**

Upright Irish Yew will grow to be about 40 feet tall at maturity, with a spread of 15 feet. It has a low canopy with a typical clearance of 3 feet from the ground, and should not be planted underneath power lines. It grows at a slow rate, and under ideal conditions can be expected to live to a ripe old age of 150 years or more; think of this as a heritage tree for future generations!

This tree performs well in both full sun and full shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This is a selected variety of a species not originally from North America, and parts of it are known to be toxic to humans and animals, so care should be exercised in planting it around children and pets.
