

**Smart Iris**  
*Iris 'Smart'*

Plant Height: 12 inches

Flower Height: 18 inches

Spread: 15 inches

Spacing: 12 inches

Sunlight:

Hardiness Zone: 3

Group/Class: Standard Dwarf Bearded

**Ornamental Features**

Smart Iris features showy purple flag-like flowers with burgundy overtones and a blue beard at the ends of the stems in mid spring. The flowers are excellent for cutting. Its sword-like leaves remain green in color throughout the season. The fruit is not ornamentally significant.

**Landscape Attributes**

Smart Iris is an herbaceous perennial with an upright spreading habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This plant will require occasional maintenance and upkeep, and should be cut back in late fall in preparation for winter. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Smart Iris is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use

### **Planting & Growing**

Smart Iris will grow to be about 12 inches tall at maturity extending to 18 inches tall with the flowers, with a spread of 15 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 12 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years.

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
